- Angular
- React
- TypeScript
- JavaScript
- HTML5
- CSS3
- Tailwind CSS
- Bootstrap

Backend Development

- C#
- .NET
- ASP.NET Core
- RESTful APIs
- Entity Framework Core

Databases

- SQL Server
- PostgreSQL
- MySQL
- MongoDB

Data & Analytics

- Power BI
- DAX
- Power Query
- Data Modeling
- Semantic Models

Microsoft Fabric & Cloud

- Microsoft Fabric
- OneLake
- Lakehouse
- Warehouse
- Dataflows Gen2
- Pipelines
- KQL (Kusto Query Language)
- Microsoft Azure

DevOps & Tools

- Git
- GitHub
- Azure DevOps
- Docker
- VS Code

PROFESSIONAL EXPERIENCE / PROJECTS

Hepherion Labs – Online Marketplace & Business Systems — Feb 2026 – Present

Project Manager

- Led end-to-end delivery of the Hepherion Labs online marketplace, from planning to launch
- Manage 10 ready-to-deploy business systems, including payroll, HR, CRM, healthcare and school
- Coordinate developers, QA and stakeholders through Agile/Scrum sprints and release cycles
- Own scope, timelines, risk tracking and UAT to ensure on-time, quality deliverables

HRCONNECT – Agentic RAG HR Information System

Project Manager / Lead Contributor

- Led the development of an HRIS system focused on leave management and HR processes
- Managed project timeline, deliverables, and cross-functional team coordination
- Aligned system requirements with business stakeholders
- Ensured successful delivery of a functional and deployable system

Task Management System (Full Stack Web Application)

Full Stack Developer

- Developed a task management system using ASP.NET Core Web API and ReactJS
- Implemented CRUD operations and user authentication
- Containerized application using Docker for consistent deployment across environments
- Designed a responsive UI using Tailwind CSS focusing on usability and performance

Mini Inventory System - Full Stack Web Application

Full Stack Developer

- Built an inventory management system using ASP.NET Core and ReactJS
- Applied SOLID principles and clean architecture for scalability and maintainability
- Implemented authentication and CRUD functionalities
- Designed a responsive and user-friendly interface using Tailwind CSS

Asset Management System (Company Project (Team Collaboration))

Team Member

- Contributed to backend and frontend development using ASP.NET Core and ReactJS
- Designed database schema using Microsoft SQL Server
- Implemented Entity Framework Core for data access layer integration
- Participated in testing, deployment, and quality assurance

AiTiman Streamlining Outpatient Care (Thesis Project)

Project Manager — **2023 – 2024**

- Led the development of a web-based outpatient care management system.
- Managed project planning, team coordination, and system documentation.
- Collaborated with the team to design and implement key system features.
- Delivered a solution that streamlined outpatient services and improved patient experience.

StarBee Printing System (School Project)

Developer & UI/ UX Designer — **2022 – 2023**

- Developed a web-based online printing booking system.
- Designed responsive user interfaces and implemented core system features.
- Collaborated with the team on requirements, development, and testing.
- Performed system maintenance, debugging, and feature enhancements.

EDUCATION

Bachelor of Science in Information Technology
Cebu Technological University – Main Campus
2025

- Major in Programming

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate
- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Microsoft Certified: Dynamics 365 Business Central Developer Associate
- DICT Start Up Bootcamp 2024
- ICT Congress 2024

TRAINING & EXPERIENCE

N-PAX Fresh Graduate Technical Training

Full Stack Developer Track **Aug 2025 - Oct 2025**

- Intensive training in full-stack development and professional soft skills
- Technologies: C#, ASP.NET Core, ReactJS, MSSQL, Entity Framework Core, Tailwind CSS, Git, Docker, Azure DevOps
- Completed Agile-based capstone project with full SDLC exposure

N-PAX AADX Training – Agentic RAG Project

Project Manager **Nov 2025**

- Led end-to-end development of Agentic RAG-based system
- Managed team tasks, timelines, and deliverables
- Strengthened leadership, communication, and technical coordination skills

SAP & Azure Team - Cloud & Data Analytics Exposure **Dec 2025 – Present**

- Hands-on exposure to Microsoft Azure services and SAP integration concepts
- Developed Power BI dashboards and data models for business insights
- Improved cloud analytics understanding and enterprise system workflows
- Exposure to Microsoft 365 Copilot for productivity automation

Mustard Seed Systems Corporation-Cebu Intern **Feb 2025 – July 2025**

- Intern Technical Support
- Administrative Support
- Customer Service Representative
- Sales Associate
